

**IARC Policy for Visitors during COVID-19 Pandemic**  
**Created 7/1/20. Last updated 2/8/2023**

**We are excited to see you at the IARC! To ensure your safety and the safety of our staff, we ask you to abide by the following protocols. SAR and IARC guidelines are constantly changing based on the CDC and state guidelines. Thank you for your understanding and patience during these unusual times.**

1. Visitors who are entering the collections space must wear a surgical mask, KN-95, or similar at all times due to the slow air exchange rate in the vaults. **Masks must be tight-fitting and cover both the nose and mouth.** Cloth masks are not acceptable.
2. For visitors to other spaces that do not include the vaults, masking is optional for those who are vaccinated. Unvaccinated individuals must wear a mask inside the Indian Arts Research Center at all times.
3. International travelers are required to follow all CDC guidelines prior to arriving at SAR.
4. Please note that the IARC vaults have a MERV-13 filtration system. Like most collection storage spaces at other museums, however, the air exchange rate is very slow in order to preserve the collections.
5. **Anyone who would like to access the vaults must 1) provide proof of their boosted COVID vaccination (photographs will be accepted) OR proof of a negative COVID test taken within 24 hours of their visit with photo identification.**
6. Public and private tours, and research and community visits are available at the discretion of the IARC and are limited to twelve (12) guests. Reservations are required.
